PROFESSIONAL EXPERIENCE	AI/ML Intern 13th June 2025 – 22nd September 2025 Ironbook AI - Developed and tested an LLM-based, RAG-enabled chatbot for JCI-compliant hospital incident reporting. - Designed and implemented incident workflows to streamline reporting and processing. - Validated incident classification logic (near miss, adverse, sentinel events). - Collaborated on UI development to improve user interaction and reporting experience. - Supported DB structuring and integration for efficient data retrieval and storage. IS ROBOTICS(Intern) 1st Feb 2024 – 7th March 2024 Internship Studio - Deployed and managed cloud services using AWS. - Worked with Ubuntu to configure and maintain server environments. - Launched and managed AWS EC2 (t2.micro) instances. - Utilized terminal commands for system administration and cloud resource management	
EDUCATION	MERI College Of Engineering and Technology 2022–2026 Bachelor of Technology in Computer Science and Engineering Bahadurgarh, Haryana GAJADAR BHAGAT COLLEGE 2020–2022 Senior Secondary Bihar	
CERTIFICATES	IBM– Introduction to Software Engineering (May 2025) AWS – Exploring Artificial Intelligence: Use Cases and Applications Exploring Artificial Intelligence: Use Cases and Applications (July 2025)	IBM– Introduction to Cloud Computing (May 2025) AWS – Fundamentals of Machine Learning and Artificial Intelligence (June 2025)
PROJECT	DEPLOY ROS ON CLOUD– The project focused on deploying ROS Neotic on the AWS cloud using Ubuntu 20.04 LTS, AWS EC2 (t2. micro) instances and terminal commands, which essentially allows the developers to monitor and run their codes on the cloud. Music Player– The Music Player project is a Python-based desktop application that allows users to play, pause, stop, and resume through audio files. Packages used in this project – pygame and tkinter. Hospital Incident Ticket Processing – Contributed to the Hospital Incident Processing project by developing and testing an LLM-based, RAG-enabled chatbot for JCI-compliant hospital incident reporting. Designed incident workflows, collaborated on UI development, validated event classification logic (near miss, adverse, sentinel), and supported DB structuring for efficient retrieval and storage of incident records.”	
TECHNICAL SKILLS	PROGRAMMING LANGUAGES: PYTHON, C, JAVA, SQL. DATABASE: BASIC OF DBMS TOOLS & SOFTWARE: MS WORD, EXCEL
